Addendum No. 1

GCA-PR-24-478 - Request for Proposals for Website Development and Maintenance Services

This addendum addresses and/or clarifies the following:

Questions & Answers:

Question 1: Is it necessary for the new platform to be developed in WordPress?

Response 1: The GCA.org website was developed using WordPress and staff have been trained to update the website on this content management system. In the interest of integrating new platforms seamlessly with existing ones, we request that all bidders work with and have expertise in utilizing WordPress.

Question 2: Is there a preference for a local vendor?

Response 2: No, the work shall be carried out by the contractor in their own offices. Therefore, contractors do not have to be located in/close to a specific location.

Question 3: Are there any obstacles to pursuing offshore development?

Response 3: Developers must be able to attend meetings with GCA and respond to requests during Central Europe working hours.

Question 4: Do you anticipate the need for any in-person support, visits, or meetings during the development/support phases?

Response 4: The GCA does not anticipate any required in-person activities or meetings to be conducted. All work/meetings may be done remotely.

All other requirements regarding the Request for Proposals remain the same.
