1. About Global Center on Adaptation

The Global Center on Adaptation (GCA) is an international organization that works as a solutions broker to catalyze action and support for adaptation solutions, from the international to the local, in partnership with the public and private sector, to ensure we learn from each other and work together for a climate resilient future. Adapting to impacts of climate change provides a “win-win” for health, livelihoods, food security, water supply, human security, and economic growth. The work of the GCA elevates the visibility and political importance of climate adaptation and facilitates solutions, such as smarter investments, new technologies and better planning to become more resilient to climate-related threats. GCA is a rapidly growing organization with offices in Abidjan, Beijing, Dhaka, Groningen, and Rotterdam.

The GCA has an ambitious 2020-2025 business plan with three pillars:

- Programs and Action: Food Security; Using Nature for more resilient infrastructure; Water for Urban Growth and Resilience; Climate Finance; Youth Leadership
- Knowledge Acceleration: Building adaptation knowledge globally through cutting edge products such as the State and Trends in Adaptation Report and the Knowledge Exchange Platform
- Agenda Setting and Advocacy: Formulating policy messages to move the global, regional, and local adaptation agendas forward.

2. Background

Sierra Leone ranks as the 24th most vulnerable country to climate change in the Notre Dame Global Adaptation Initiative (ND-GAIN) Country Index. Sierra Leone, one of the poorest countries in the world, faces multiple risks from climate change that threaten key economic sectors and increases the potential for wider environmental degradation.

The country’s capital, Freetown, faces climate-induced phenomena such as increasing seasonal and interannual variability in precipitation; more frequent and intense floods; coastal erosion, inundation and saline intrusion, attributed to sea level rise and challenges induced by climate change drainage congestion; riverbank erosion; and wider salinity in surface water, groundwater, and soil. Forest loss and degradation in the upper western peninsula catchment amplifies the effects of the natural hazards, through erosion and landslides, on the city.

Additionally, the city is facing challenges around limited provision of water and sanitation services, couple with aging or insufficient infrastructures, which are exacerbated by the aforementioned climate change effects.

African Development Bank (AfDB) is implementing the Freetown WASH and Aquatic Environment Revamping Program to address these multi-faceted challenges in Freetown. The project has the overall objective of improving water supply and sanitation services while ensuring the sustainability of the vital aquatic ecosystem in the Western Area of Freetown. (See Annex A for more details about the project.)

GCA is providing technical assistance to AfDB in preparation of a Green Climate Fund (GCF) funding proposal aiming to mainstream climate resilience and adaptation into the strengthening of WASH systems by the ongoing Freetown WASH and Aquatic Environment Revamping Program. GCA’s engagement will focus on three aspects: (i) overall funding proposal technical support, (ii) development of feasibility study and financial analyses, and (iii) preparation of gender assessments and gender action plan.
3. **Objective of the Assignment**

GCA is seeking a qualified Individual Consultant (IC) to provide technical assistance for the development of GCF funding proposal, especially ensuring integration of climate adaptation.

4. **Scope of the Services, Key Tasks and Activities to be Performed**

The Consultant will support the GCF funding proposal, which should include but not be limited to the following tasks:

- Review of relevant project documents including the project appraisal report, draft GCF concept note, previous studies developed in relation to the scope of work to be undertaken, draft Funding proposal
- Providing inputs to the funding proposal, with particular attention to mainstreaming of climate adaptation measures,
- Reviewing the funding proposal and its annexes,
- Coordinating the deliverables of GCA’s gender specialist and economist consultants, and ensuring their quality, and
- Ensuring GCF review comments from earlier stages are addressed in the final version of the document.

In consultation with AfDB and GoSL (in particular Environment Protection Agency, EPA), the GCA reserves the right to make necessary adjustments to the aforementioned scope.

5. **Expected Outcome and Deliverables**

The Consultant can provide their review notes on the relevant documents or as stand-alone documents, based on AfDB’s guidance. Overall, the key timelines related to deliverables are as follows:

<table>
<thead>
<tr>
<th>Deliverables</th>
<th>Deadline (tentative)</th>

</tr>
<tr>
<td>Provide inputs for the finalization of the funding proposal including providing support to response of comments from the GCF review process</td>

</tr>
</tbody>
</table>

6. **Institutional and Organization Arrangements**

The Consultant will report to and will be supported by the GCA Global Lead, Water and Urban or a delegated Water and Urban team member.

Annex A: Freetown WASH and Aquatic Environment Revamping Project

Baseline Project

The four components under the baseline project (Freetown WASH and Aquatic Environment Revamping project) are briefly outlined below:

Component 1: Water Supply Infrastructure Improvement – Immediate Investments: The activities under this component will include rehabilitation and new construction of water supply infrastructure for which detailed studies have been completed. The infrastructure includes development of raw water sources, water treatment works, pumping stations and water transmission and distribution mains.

Component 2: Integrated Infrastructure Improvement: This component provides for implementation of the key outcomes and recommendations of the Freetown Water Supply and Sanitation Master Plan and Investment Studies project financed by the Bank/African Water Facility and Netherlands Enterprise Agency-D2B. The study outputs, including the detailed technical designs and tender documents will be available by the end of February 2021. The component activities will include the priority investments that are required to improve access to water supply and sanitation services for the current residents of the city.

Component 3: Capacity for IWRM and Livelihood Improvement: In line with the integrated approach to water resources management, this component is intended to provide for interventions that will safeguard the water-shed and water bodies within and around the Freetown Peninsula through a holistic approach to managing the impact of human activities on the aquatic environment. In this regard, the component will finance provision of tools and amenities that facilitate adoption of water and waste management practices that minimise water related hazards and more especially the enhanced impact due to climate change.

Component 4: Project Management: This involves overall project coordination and administration, technical oversight and quality assurance, monitoring, evaluation and reporting, including environmental and water quality monitoring.

Project Components proposed for GCF Financing

The proposed project components for GCF funding includes 4 main components and related sub-components that have been sub-divided into two sub-programs; Sub-program 1 that includes climate resilient water and sanitation infrastructure and Sub-program 2 that includes Enhancing Climate Information Systems for Resilient Development in Sierra Leone (Climate Information and Early warning systems). The details are as follows:

Sub-Program 1

Component 1: Integrated Infrastructure Improvement

These will include implementation of two core sub-components covering climate resilient forest management and sanitation interventions. They are as follows:

Component 1-1: Strengthened Climate Resilient Forest Management: Activities include: (i) undertaking a multi-resource forest inventory and elaboration of a forest landscape
management plan for the Western Peninsula Area; (ii) establishing a methodology for monitoring, reporting and verification for emission reductions; (iii) developing forest reference emission levels; (iv) quantifying the emissions and removals associated with each of the identified drivers of deforestation and forest degradation; (v) establishing and operationalizing a national forest monitoring system (NFMS); (vi) quantifying the contribution of the forest sector to the national economy. The outputs will entail:

(a) **Reforestation of upper catchment areas.** Forest management plans for the western peninsula area will be prepared and implemented with a view to obtaining the most appropriate climate change adaptation and mitigation results. Where forest already exists, particularly in the central peninsula mountains, these areas will be protected from deforestation as general best practice.

(b) **Provision of alternative livelihoods for reducing deforestation and forest degradation.** This includes strengthening community-based resilience (i.e. forest-based economic, social and environmental benefits), including improvement in livelihoods of forest dependent communities settled on the fringes of the Western Peninsula National Park thereby generating employment and provision of economic alternatives to deforestation.

(c) **Installation of surveillance stations and surveillance/monitoring equipment within the Western Area Peninsular Protected Forest Area.** Activities include establishment of watershed protection and surveillance infrastructure which will include remote surveillance equipment both hardware and software, forest guard posts, buffer zone strengthening and incident response logistics.

**Component 1-2: Strengthened resilient infrastructure improvements:** The activities under this component involve improvement of drainage and solid waste management as part of flood control. The outputs include:

9.3 If the Contract is terminated or dissolved, or upon any reasonable request of the GCA, the Contractor must ensure that all materials, electronic media, documentation and other information that includes data and/or information made available by the GCA
shall be returned to the GCA immediately and all digital or other copies are destroyed, deleted and removed.

ARTICLE 10

11) Intellectual, Industrial and Proprietary Rights

10.1 All right, title and interest in the Deliverables, including any products, methods, works and/or materials developed by the Contractor, in whole or in part, during or in connection with this Contract, shall automatically vest in the GCA upon creation and the GCA shall be the sole and unlimited owner thereof and of rights therein throughout the world perpetually. GCA shall retain all such rights therein, including but not limited to statutory copyrights, and all renewals thereof, as a copyright author and proprietor.

10.2 The Contractor agrees to execute and deliver, and to use maximum endeavors to cause any subcontractor to execute and deliver, to GCA any and all materials, instruments, source documents, designs, instructions and codes reasonably required by the GCA in connection with the use, adaption, execution and enjoyment of the Deliverables and of the GCA’s rights therein and thereto.

10.3 Contractor undertakes to do everything necessary to ensure that all existing and any future Intellectual and/or Industrial Property Rights pertaining to the Deliverables are (and remain) vested with GCA or with third party designated by the GCA. The Fee or rates that Contractor charges to GCA in the context of the Contract shall be deemed, in as far as necessary, to include payment for these Intellectual and/or Industrial Property Rights. To effect this transfer, the following acts must at any rate be performed: by signing the Contract, Contractor transfers to GCA all existing and future Intellectual and/or Industrial Property Rights to existing and future Deliverables and the results of the Services.

10.4 Insofar as these acts prove not to ensure that all Intellectual and/or Industrial Property Rights are transferred to the GCA, the Contractor undertakes, if the situation arises, to do everything possible to effect the transfer, without the Contractor being allowed to attach further conditions to its cooperation. As long as this has not been done, Contractor hereby gives the GCA: an irrevocable authorization to exercise and protect the powers arising from the relevant Intellectual and/or Industrial Property Rights in and out of court; an exclusive, royalty-free, transferable, irrevocable, perpetual and worldwide license to use all Deliverables and the Intellectual and/or Industrial Property Rights pertaining thereto.

10.5 Notwithstanding the foregoing, insofar as Contractor has made any material available to GCA, to which material Contractor has Intellectual and/or Industrial Property Rights, Contractor states that it shall grant GCA a non-exclusive and non-transferable right to use this material.

10.6 The Contractor shall hold or obtain all consents, permissions and/or clearances in third-party intellectual property rights necessary to enable it to perform the Services. The
Contractor shall be liable for any violation of legal provisions or rights of third parties in respect of all rights used in the Deliverables or during the performance of the Services. The Contractor, to the extent permitted by law, agrees to indemnify and hold harmless the GCA from all claims and causes of action asserted by third parties based on (alleged) Intellectual and/or Industrial Property Rights or on any other basis.

10.7 It is acknowledged and agreed by the Parties that GCA owns all property rights and may use, adapt, add to and subtract from the Deliverables and combine these with other artistic or literary material and to publish the result by any means, it being understood that the Contractor (including its employees and subcontractors) hereby waives and agrees not to exercise or enforce any so-called “moral rights” which may now or may hereafter be recognized.

10.8 GCA grants Contractor a non-exclusive, non-transferable, non-assignable and limited right and license to use the following only to perform the Services in accordance with this Contract: The GCA’s trademarks, trade names, tag lines logos or service marks and any information made available to the Contractor by the GCA.

10.9

**ARTICLE 11**

12) **Termination of the Contract**

11.1 In addition to the statutory provisions pertaining to termination, in the cases below, without judicial intervention or further notice of default, whole or partial termination of this Contract shall be possible, with immediate effect, by:

11.1.1 Either Party, if the other Party becomes insolvent, has applied for a suspension of payment, or that other Party has been adjudicated bankrupt;

11.1.2 Either Party, if the other Party is prevented by force majeure from complying with its obligations wholly or in part for a period of three months or more;

11.1.3 Either Party, if the other Party discontinues its business operations;

11.1.4 The GCA, if the Contractor, after a written demand from the GCA allowing a reasonable time for compliance, still fails attributably to comply promptly, properly or at all with any obligation under this Contract;

11.1.5 The GCA, if there is any doubt about the reliability and/or integrity of the Contractor, resulting from the screening process including but not limited to, for example, the condition that it has been determined that the Contractor has been involved in serious incidents or irregularities with previously contracted persons, clients, employers and/or on previous assignments;

11.1.6 The GCA, if one or more of the exclusion criteria mentioned in section I or section II of the signed Declaration on Honor becomes true for the Contractor.

11.2 Termination of this Contract shall not affect the other rights and/or recovery possibilities of the Party terminating it.
11.3 In the event of termination by GCA due to the fault of the Contractor, the GCA shall withhold and deduct from payment to Contractor the amount reasonably deemed necessary to complete the Services and deliver the Deliverables.
