1. Introduction

1.1 Global Center on Adaptation

The Global Center on Adaptation (GCA) is an international organization that works as a solutions broker to catalyze action and support for adaptation solutions, from the international to the local, in partnership with the public and private sector, to ensure we learn from each other and work together for a climate resilient future. Adapting to impacts of climate change provides a “win-win” for livelihoods, food security, water supply, health, security, and economic growth. The work of the GCA elevates the visibility and political importance of climate adaptation and facilitates solutions, such as smarter investments, new technologies and better planning to become more resilient to climate related threats. GCA is a rapidly growing organization with offices in Abidjan, Beijing, Dhaka, Groningen, and Rotterdam.

The GCA’s ambitious 2020-2025 business plan and strategy have three pillars:

- Programs: Food Security; Using Nature for more resilient infrastructure; Water for Urban Growth and Resilience; Climate Finance; Youth Leadership.
- Knowledge: Building adaptation knowledge globally through cutting edge products such as the State and Trends in Adaptation Report and the Adaptation Knowledge Portal.
- Advocacy and Awareness: Formulating policy messages to move the global, regional, and local adaptation agendas forward.

1.2 Program Background Information

The GCA is committed to advancing innovative strategies that integrate climate adaptation and sustainable development, particularly in regions vulnerable to climate change. One such strategy is the promotion of nature-based solutions (NbS) – approaches that leverage natural processes and ecosystems to address climate change impacts along with environmental, social, and economic challenges.

In Africa, railway lines are critical infrastructure, supporting economic growth by connecting remote areas, facilitating trade, and providing access to markets, services, and employment opportunities. However, the land and right of way associated with these railway lines often represent underutilized assets with significant potential for environmental and economic enhancement.

The GCA is exploring the potential for deploying NbS along these railway corridors as adaptation measures to mitigate climate risks. This includes practices such as reforestation, afforestation, soil and water conservation, and the restoration of natural habitats. These solutions can not only enhance biodiversity and improve ecosystem services but also contribute to climate resilience by mitigating the impacts of climate change, such as flooding and soil erosion.

A key focus of the present initiative is to quantify and unlock the financial benefits that can be derived from NbS projects for adaptation through the generation of carbon credits. By sequestering carbon dioxide, these projects can produce carbon credits that can be traded in global carbon markets. This creates a revenue stream for railway companies and landowners, transforming what might otherwise be an unproductive expense into a valuable asset acting for adaptation and mitigation jointly. The proceeds from these carbon credits can then be reinvested into further developing and maintaining the railway infrastructure. This approach

aligns with the broader goals of sustainable development by creating a self-sustaining mechanism that supports both economic growth, environmental stewardship and climate adaptation.

Through this initiative, the GCA aims to showcase the dual benefits of NbS: enhancing the sustainability of critical infrastructure while providing a new source of finance that can accelerate the development of railway networks across Africa. This concept note will specifically examine, on a high level, the opportunities and challenges associated with implementing NbS along railway lines, with a particular emphasis on projects in Tanzania as a representative case study.

There will be no public opening session for the proposals received. Offers will be opened privately by GCA after the closing time specified for the receipt of proposals. No public announcement of the contents of any offer will be made at any time.

5. Evaluation of Proposals and Bidders

The evaluation of bidders and proposals will be done in accordance with the following subsequent steps:

- Verification that the bidder fulfils the Exclusion Criteria in Section 5.1 and that it is not in one of the situations covered by the exclusion criteria listed in EU Directive 2014/24/EU.
- Verification that the bidder has the appropriate capacities to perform the contract based on the Selection Criteria described in Section 5.2 (only for those bidders that were not excluded based on the Exclusion Criteria).
- Evaluation of the bidder based on the Award Criteria described in Section 5.3 (only for those bidders that have met the Selection Criteria). Scoring for each Award Criterion will be conducted using the following scale:
 - Excellent
 - Good
 - Average
 - Below average
 - Poor
- The Evaluation Committee shall evaluate the technical proposals first and shall thereafter open and evaluate the financial proposals of only those bidders whose technical proposals meet the minimum technical score.
- Where individual scoring is adopted, the Evaluation Committee shall discuss scores where there are significant discrepancies prior to computing the average score for each criterion.
- During financial evaluation, where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern. Where there is a discrepancy between the unit rate and the line-item total resulting from multiplying the unit rate by the quantity, the unit rate shall govern, unless in the opinion of the Evaluation Committee there is an obviously gross misplacement of the decimal point in the unit rate, in which case the line-item total shall govern, and the unit rate shall be corrected.

The proposal must comply with the GCA strategic requirements set in this RFP as a precondition to be assessed. In a case of non-compliance with the Exclusion Criteria, the bidder will be informed of the grounds for rejection without being given feedback on the content of the proposal other than on the non-compliant elements.

The evaluation of proposals shall be carried out by an Evaluation Committee made up of representatives of GCA. Any attempt by a bidder to influence the Evaluation Committee in the process of examination, clarification, evaluation, due diligence checks, etc., to obtain information on how the procedure is progressing or to influence GCA in its decision concerning the award of the contract, will result in the immediate rejection of the bidder's proposal.

In the interest of transparency and equal treatment, without being able to modify their proposals, bidders may be required, at the sole written request of the Evaluation Committee (via Procurement), to provide clarifications within 48 hours. Requests for clarification will only seek minor clarifications of information already submitted by the bidder. No modifications to a proposal can be sought or accepted through a request for clarification (except for the correction of arithmetical errors discovered during the evaluation of the proposal).

5.1 Exclusion Criteria

Participation in this RFP is open on equal terms to any natural and legal companies not in any of the situations listed in Article 57 of the EU Directive 2014/24/EU.

Bidders shall provide a Declaration of Honor (see Annex 2), duly signed and dated, including a statement that they are not in any of the situations listed in Article 57 of EU Directive 2014/24/EU. In case of a joint proposal such declaration shall be submitted for each partner. The declaration shall also be submitted for the subcontractors, when relevant.

Besides the submission of the signed Declaration of Honor, the bidder undertakes to inform GCA, without delay, of any changes to their situation in this regard.

Bidders may be excluded from participation in this RFP if they are found to be in one of the situations for exclusion or fail to submit the above-mentioned declaration.

5.2 Selection Criteria

Bidders will be evaluated against each Selection Criterion based on the documentary evidence submitted by the bidder. Failure to submit the evidence requested will lead to a rejection of the proposal. Bidders will be evaluated against the Selection Criteria on a **[pass/fail basis]**. Bidders who meet the Selection Criteria will be put on an equal footing for the next stage of the evaluation process based on the Award Criteria.

5.3 Award Criteria

Proposals will be rated on both technical and financial bases, using the best value for money approach. The selection method will choose the highest rated proposal using the combined scoring method, which assigns the weight distribution between the technical and financial proposals. The overall combined score will be 70 points, the weight distribution shall be 70 points for the technical proposal and 30 points for the financial proposals.

It is important to note that the required Minimum Technical Score for the Technical Proposal is [70%]. Only proposals obtaining the Minimum Technical Score or more in the Technical Evaluation will progress to the Financial Evaluation.

Technical Proposals scoring less than the Minimum Technical Score will be considered of insufficient quality and shall be rejected. The contract shall be awarded to the top ranked bidder who submitted the most economically advantageous tender based on the best price quality ratio in accordance with the following criteria:

For the purposes of the evaluation of the Financial Proposal, the bidder offering the lowest price shall receive the maximum total score of 30 points. The score of all other financial proposals will be calculated using the following formula:

$$\text{Financial score} = (\text{Lowest bid} / \text{Current bid}) \times \text{Maximum points to be awarded}$$

After careful scoring of each bidder's proposal (technical and financial), GCA shall award the contract to the bidder that obtains the highest combined technical and financial score. The decision will be communicated by email to all bidders.

6. RFP Cancellation

GCA reserves the right to cancel this RFP process at any point. GCA shall not be liable for any compensation with respect to interested bidders whose submissions have not been accepted, nor shall it be so liable if it decides not to award the contract.

- 3) Exceptional circumstances or force majeure render normal performance of the project impossible.
- 4) All technically compliant proposals significantly exceed the financial resources available.
- 5) There have been irregularities in the procedure where these have prevented fair competition.

In the event of cancellation of RFP procurement proceedings, bidders will be notified by GCA.

7. Ownership of Proposals Submitted

Any document submitted in reply to this RFP will become the property of GCA and will be regarded as confidential.

Annex 3: Scope of Work/Terms of Reference

Background

The Global Center on Adaptation (GCA) is an international organization that works as a solutions broker to catalyze action and support for adaptation solutions, from the international to the local, in partnership with the public and private sector, to ensure we learn from each other and work together for a climate resilient future. Adapting to impacts of climate change provides a “win-win” for livelihoods, food security, water supply, health, security, and economic growth. The work of the GCA elevates the visibility and political importance of climate adaptation and facilitates solutions, such as smarter investments, new technologies and better planning to become more resilient to climate related threats.

The GCA is committed to advancing innovative strategies that integrate climate adaptation and sustainable development, particularly in regions vulnerable to climate change. One such strategy is the promotion of nature-based solutions (NbS) – approaches that leverage natural processes and ecosystems to address climate change impacts along with environmental, social, and economic challenges.

In Africa, railway lines are critical infrastructure, supporting economic growth by connecting remote areas, facilitating trade, and providing access to markets, services, and employment opportunities. However, the land and right of way associated with these railway lines often represent underutilized assets with significant potential for environmental and economic enhancement.

The GCA is exploring the potential for deploying NbS along these railway corridors as adaptation measures to mitigate climate risks. This includes practices such as reforestation, afforestation, soil and water conservation, and the restoration of natural habitats. These solutions can not only enhance biodiversity and improve ecosystem services but also contribute to climate resilience by mitigating the impacts of climate change, such as flooding and soil erosion.

A key focus of the present initiative is to quantify and unlock the financial benefits that can be derived from NbS projects for adaptation through the generation of carbon credits. By sequestering carbon dioxide, these projects can produce carbon credits that can be traded in global carbon markets. This creates a revenue stream for railway companies and landowners, transforming what might otherwise be an unproductive expense into a valuable asset acting for adaptation and mitigation jointly. The proceeds from these carbon credits can then be reinvested into further developing and maintaining the railway infrastructure. This approach aligns with the broader goals of sustainable development by creating a self-sustaining mechanism that supports both economic growth, environmental stewardship and climate adaptation.

Through this initiative, the GCA aims to showcase the dual benefits of NbS: enhancing the sustainability of critical infrastructure while providing a new source of finance that can accelerate the development of railway networks across Africa. This concept note will specifically examine, on a high level, the opportunities and challenges associated with implementing NbS along railway lines, with a particular emphasis on projects in Tanzania as a representative case study.

Objectives

The consultant will be tasked with developing a comprehensive concept note (5-10 pages) that outlines the potential for nature-based solutions (NbS) along railway lines in Africa. The concept note will serve as a strategic document to guide railway companies and landowners in realizing financial benefits through the implementation of NbS projects, with a particular focus on generating carbon credits. The consultant's work will include the following key activities:

- **High-level case analysis of NbS Potential:**
 - High-level evaluation of the feasibility of implementing Nature-based Solutions (NbS) along Africa or adopting a focus on a specific country to be selected in collaboration with the GCA at the start of the assignment. Special focus should be given on:
 - high-level insights for reforestation, habitat restoration, and sustainable land management within railway rights-of-way (ROW).
 - high-level insights on regenerative agro-ecological practices and regeneration of degraded land.
 - The geographical area could be regional, continental, or one specific country of interest in a relevant area to be determined in coordination with the GCA at the start of the assignment. Potential country of interest includes Benin, yet may be refined based on the Consultant specific expertise
 - Provide an overview of potential financial benefits from carbon credits, referencing relevant carbon credit frameworks and estimating possible volumes.
- **Data Collection from global datasets to enrich the high-level Analysis:**
 - On the specific case selected upon coordination with the GCA at the start of the assignment (previous objective): Summarise available data from global sources that are applicable to the African context, identify any significant gaps, and briefly benchmark against successful NbS examples from other regions. This will include data on successful NbS projects along railway corridors and degraded agricultural lands in other regions, as well as insights into how these projects can be adapted for Africa. An emphasis should be made towards NbS that can serve as climate adaptation measures, to mitigate climate risks on the assets.
- **Deep Dive into Tanzania Railway Projects:**
 - Conduct an in-depth analysis of railway projects in Tanzania, serving as a representative case study for the concept note. This deep dive will include:
 - Detailed mapping of the railway lines in Tanzania, including the ROW and adjacent land.
 - Assessment of the ecological and environmental conditions along these routes to determine their suitability for various NbS initiatives.
 - Analysis and quantification of existing and potential NbS projects/case-studies for climate adaptation purposes in Tanzania, including their financial performance and impact on local communities and ecosystems.

The approach can be built on inputs data from GCA ongoing projects in Tanzania, including the potential needs for NbS as adaptation measures.

- Evaluation of the potential for carbon credit generation through NbS along these railway lines, with projections for revenue streams that could be reinvested into railway infrastructure development.
- **Actionable Recommendations:**
 - Based on the analysis, provide clear and actionable recommendations for railway companies and landowners on how to implement NbS projects for climate adaptation along their railway corridors. This will include guidance on:
 - Identifying priority areas within the ROW that are most suitable for NbS implementation as adaptation measures.
 - Engaging with local communities, stakeholders, and experts to ensure successful project implementation and long-term sustainability.
 - Navigating regulatory and legal frameworks to facilitate the approval and execution of NbS projects. A detailed approach to address land tenure and ownership complexities across railway assets should be included, ensuring clear, actionable pathways for stakeholder engagement, land-use agreements, and regulatory approvals.
 - Accessing and leveraging carbon markets to monetize the environmental benefits of NbS, with specific steps on how to register, verify, and sell carbon credits. This should also include best practices for addressing financial, regulatory, and compliance challenges in generating carbon credits, and guidance on creating a robust monitoring framework to ensure transparent, reliable data for carbon credit validation (with emphasis on compliance with market standards and maximizing credit generation).
 - Recommend screening processes and criteria to assess the suitability of ROW for NbS, in particular for adaptation, ensuring that only areas with the highest potential for successful projects are selected.

Scope of Work

The consultant's work will include, but is not limited to:

- **Data Collection and Analysis:**
 - Compile available global data on Nature-based Solutions (NbS), with a specific focus on successful projects and innovative practices in Africa on railway corridors and regenerative agricultural practices, in particular for climate adaptation.
 - Analyze and quantify on a high level the potential for carbon credit generation from NbS, exploring revenue opportunities and long-term financial benefits.
 - Perform an in-depth case study of railway projects in Tanzania, including analysis of environmental, social, and economic impacts, as well as carbon credit potential, to serve as a model for broader regional applications.
- **Stakeholder Consultation:**
 - Engage with key stakeholders, including railway companies, landowners, and environmental experts, to gather insights and validate data.
- **Development of Concept Note:**
 - Draft a comprehensive concept note outlining the potential of NbS for railway lines in Africa.
 - Include detailed sections on financial projections, case studies, and strategic recommendations, showcasing potential returns from carbon credits, as well as funding pathways and financial structures.

Deliverables

- A concept note (10 pages executive summary), in English, on the potential for NbS along railway lines in Africa and the opportunity to access and leverage carbon markets, with a deep dive into Tanzania, and including recommendations for railway companies and ROW landowners.
- Appendixes:
 - Insights from the high-level analysis of NbS Potential

Indemnification

- 8.1 The Contractor shall indemnify, defend, to the fullest extent possible under applicable law, including reasonable attorney's fees and expenses, and hold harmless the GCA against all claims, fines, suits, losses, costs and damages in connection with and/or resulting from any default in relation to Article 7.
- 8.2 The Contractor shall further indemnify, defend, to the fullest extent possible under applicable law, including reasonable attorney's fees and expenses, and hold harmless the GCA against all claims, fines, costs, suits, losses, and damages in connection with or arising from (i) any act or omission to act in relation to the Services, unless such act or omission to act directly results from any act of the GCA for which it can be seriously blamed, or (ii) any breach of this Contract or any applicable national or international law by the Contractor or by those for whom it is responsible. The Contractor waives any entitlement pursuant to article 7:658 sub 4 (*BW*) Dutch Civil Code.
- 8.3 Without prejudice to any other rights set out in this Contract, each Party (hereinafter the "**Indemnifying Party**") hereby agrees to indemnify, defend and hold harmless the other Party (hereinafter the "**Indemnified Party**") from and against any and all losses

arising out of or in relation to third-party claims of any kind which, if proven by a non-appealable decision by the courts, would constitute a breach of the warranties made by the Indemnifying Party.

- 8.4 If a claim is made that may give rise to a claim for indemnity under this Article 8, then the Indemnified Party shall notify the Indemnifying Party of such claim immediately, give the Indemnifying Party all reasonable co-operation and shall not negotiate the claim without the consent of the Indemnifying Party in writing.
- 8.5 Should changes occur during the term of this Contract that are (or could be) relevant to the assessment of the legal relationship between the Parties for tax purposes, national insurance and/or civil law, the Contractor shall inform GCA immediately in writing.

ARTICLE 9

Confidentiality and Marks

- 9.1 The Contractor shall keep confidential and shall not, during the performance of the Services or at any time after the expiry or termination of this Contract, disclose to any person or make use of (i) any agreements, financial information, correspondence, documents or other information relating to the GCA which the Contractor has obtained during the course of this Contract or the provision of the Services, or (ii) any other confidential information which the Contractor has obtained in the course of this Contract or the provision of the Services, or (iii) any information contained in this Agreement, in each case without the prior written consent of the GCA. The Contractor undertakes to take sufficient measures to ensure confidentiality with respect to all business data and information of GCA and/or of its business partners, unless (i) the use or disclosure of this information and data is necessary for the proper performance of the Services, or (ii) such information and data have become generally known without this being due to breach of the duty of confidentiality, or (iii) the disclosure of such information is required by court order or any other legal process.
- 9.2 The Contractor undertakes to use the data and information referred to in Article 9.1 only to perform the Services.
- 9.3 If the Contract is terminated or dissolved, or upon any reasonable request of the GCA, the Contractor must ensure that all materials, electronic media, documentation and other information that includes data and/or information made available by the GCA shall be returned to the GCA immediately and all digital or other copies are destroyed, deleted and removed.

ARTICLE 10

Intellectual, Industrial and Proprietary Rights

- 10.1 All right, title and interest in the Deliverables, including any products, methods, works and/or materials developed by the Contractor, in whole or in part, during or in connection with this Contract, shall automatically vest in the GCA upon creation and the GCA shall be the sole and unlimited owner thereof and of rights therein throughout

the world perpetually. GCA shall retain all such rights therein, including but not limited to statutory copyrights, and all renewals thereof, as a copyright author and proprietor.

- 10.2 The Contractor agrees to execute and deliver, and to use maximum endeavors to cause any subcontractor to execute and deliver, to GCA any and all materials, instruments, source documents, designs, instructions and codes reasonably required by the GCA in connection with the use, adaptation, execution and enjoyment of the Deliverables and of the GCA's rights therein and thereto.
- 10.3 Contractor undertakes to do everything necessary to ensure that all existing and any future Intellectual and/or Industrial Property Rights pertaining to the Deliverables are (and remain) vested with GCA or with third party designated by the GCA. The Fee or rates that Contractor charges to GCA in the context of the Contract shall be deemed, in as far as necessary, to include payment for these Intellectual and/or Industrial Property Rights. To effect this transfer, the following acts must at any rate be performed: by signing the Contract, Contractor transfers to GCA all existing and future Intellectual and/or Industrial Property Rights to existing and future Deliverables and the results of the Services.
- 10.4 Insofar as these acts prove not to ensure that all Intellectual and/or Industrial Property Rights are transferred to the GCA, the Contractor undertakes, if the situation arises, to do everything possible to effect the transfer, without the Contractor being allowed to attach further conditions to its cooperation. As long as this has not been done, Contractor hereby gives the GCA: an irrevocable authorization to exercise and protect the powers arising from the relevant Intellectual and/or Industrial Property Rights in and out of court; an exclusive, royalty-free, transferable, irrevocable, perpetual, and worldwide license, to use all Deliverables and all Intellectual and/or Industrial Property Rights pertaining thereto.
- 10.5 Notwithstanding the foregoing, insofar as Contractor has made any material available to GCA, to which material Contractor has Intellectual and/or Industrial Property Rights, Contractor states that it shall grant GCA a non-exclusive and non-transferable right to use this material.
- 10.6 The Contractor shall hold or obtain all consents, permissions and/or clearances in third-party intellectual property rights necessary to enable it to perform the Services. The Contractor shall be liable for any violation of legal provisions or rights of third parties in respect of all rights used in the Deliverables or during the performance of the Services. The Contractor, to the extent permitted by law, agrees to indemnify and hold harmless the GCA from all claims and causes of action asserted by third parties based on (alleged) Intellectual and/or Industrial Property Rights or on any other basis.
- 10.7 It is acknowledged and agreed by the Parties that GCA owns all property rights and may use, adapt, add to and subtract from the Deliverables and combine these with other artistic or literary material and to publish the result by any means, it being understood that the Contractor (including its employees and subcontractors) hereby

waives and agrees not to exercise or enforce any so-called “moral rights” which may now or may hereafter be recognized.

- 10.8 GCA grants Contractor a non-exclusive, non-transferable, non-assignable and limited right and license to use the following only to perform the Services in accordance with this Contract: The GCA’s trademarks, trade names, tag lines logos or service marks and any information made available to the Contractor by the GCA.

ARTICLE 11

Termination of the Contract

- 11.1 In addition to the statutory provisions pertaining to termination, in the cases below, without judicial intervention or further notice of default, whole or partial termination of this Contract shall be possible, with immediate effect, by:
- 11.1.1 Either Party, if the other Party becomes insolvent, has applied for a suspension of payment, or that other Party has been adjudicated bankrupt;
 - 11.1.2 Either Party, if the other Party is prevented by force majeure from complying with its obligations wholly or in part for a period of three months or more;
 - 11.1.3 Either Party, if the other Party discontinues its business operations;
 - 11.1.4 The GCA, if the Contractor, after a written demand from the GCA allowing a reasonable time for compliance, still fails attributable to comply promptly, properly or at all with any obligation under this Contract;
 - 11.1.5 The GCA, if there is any doubt about the reliability and/or integrity of the Contractor, resulting from the screening process including but not limited to, for example, the condition that it has been determined that the Contractor has been involved in serious incidents or irregularities with previously contracted persons, clients, employers and/or on previous assignments;
 - 11.1.6 The GCA, if one or more of the exclusion criteria mentioned in section I or section II of the signed Declaration on Honor becomes true for the Contractor.
- 11.2 Termination of this Contract shall not affect the other rights and/or recovery possibilities of the Party terminating it.
- 11.3 In the event of termination by GCA due to the fault of the Contractor, the GCA shall withhold and deduct from payment to Contractor the amount reasonably deemed necessary to complete the Services and deliver the Deliverables.
- 11.4 Unless and to the extent otherwise specified in this Contract, on the termination of this Contract for any reason, the GCA shall be responsible for paying the part of the Fee for Deliverables that have been accepted by the GCA up to and including the effective date of termination.
- 11.5 In the event that either Party wishes to terminate this Contract, a 30-day notice period will be taken into account by both the Contractor and the GCA, except for the situations mentioned in Article 11.1 above.
- 11.6 The following Articles shall survive any termination, cancellation or expiration of this Contract, together with any other provisions herein that by their nature shall survive:

Article 7 (Warranties), Article 8 (Indemnification), Article 9 (Confidentiality and Marks), Article 10 (Intellectual, Industry and Proprietary Rights), Article 14.8 (Notice) and Article 15 (Applicable Law).

ARTICLE 12

Liability

12.1 In case the Dutch Tax Authorities and/or the Implementing Authority with regard to social security (*Uitvoeringsinstelling, "UWV"*) decide(s) that one or more of the invoices paid under this Contract are subject to wage tax and / or social security contributions, GCA shall levy the statutory deductions due and these shall be borne by Contractor, except for the premiums in respect of employees' insurances (*premies werknemersverzekeringen*) and the income dependent contribution pursuant to the Act on Insurance for Care (*inkomensafhankelijke bijdrage Zorgverzekeringswet*). From that moment all the fees involved will be considered as (gross) wages including holiday allowance and be reduced to the level where payment without wage taxes and/ or social security contributions can take place.

ARTICLE 13

Sickness and Inability to Work

13.1 The Contractor agrees to bear the risks pertaining to the Services, including sickness and inability to work, and if the Contractor takes out insurance to cover such risks, the Contractor shall bear the cost of such insurance.

13.2 The Contractor shall not invoice the GCA any days on which the Contractor was unable to perform the Services due to illness, leave or any other reason.
