## 1. Introduction

### 1.1 Global Center on Adaptation

The Global Center on Adaptation (GCA) is an international organization that works as a solutions broker to catalyze action and support for adaptation solutions, from the international to the local, in partnership with the public and private sector, to ensure we learn from each other and work together for a climate resilient future. Adapting to impacts of climate change provides a “win-win” for livelihoods, food security, water supply, health, security, and economic growth. The work of the GCA elevates the visibility and political importance of climate adaptation and facilitates solutions, such as smarter investments, new technologies and better planning to become more resilient to climate related threats. GCA is a rapidly growing organization with offices in Abidjan, Beijing, Dhaka, Groningen, and Rotterdam.

The GCA’s ambitious 2020-2025 business plan and strategy have three pillars:

- Programs: Food Security; Using Nature for more resilient infrastructure; Water for Urban Growth and Resilience; Climate Finance; Youth Leadership.
- Knowledge: Building adaptation knowledge globally through cutting edge products such as the State and Trends in Adaptation Report and the Adaptation Knowledge Portal.
- Advocacy and Awareness: Formulating policy messages to move the global, regional, and local adaptation agendas forward.

### 1.2 Program Background Information

The Water and Urban program at GCA addresses barriers to integrating adaptation into water supply and urban resilience projects. It provides analysis, technical support, climate risk assessments, design guidelines, investment options, and capacity building. In this context, the Water and Urban program at GCA supports climate resilience into investments, by addressing key barriers to integrating adaptation into water and urban resilience projects. GCA delivers upstream analysis and technical support to develop information and metrics on climate hazards, assets exposure, vulnerability hotspots, and finally adaptation and resilience options that are financially viable.

The Global Center on Adaptation (GCA) has partnered with the African Development Bank (AfDB) to provide support on a gender vulnerability assessment, for a water and energy investment project in Gabon titled “Integrated Program for the Development of Water and Energy Resources program in Libreville” that will be funded by AfDB.

There will be no public opening session for the proposals received. Offers will be opened privately by GCA after the closing time specified for the receipt of proposals. No public announcement of the contents of any offer will be made at any time.

## 5. Evaluation of Proposals and Bidders

The evaluation of bidders and proposals will be done in accordance with the following subsequent steps:

- Verification that the bidder fulfils the Exclusion Criteria in Section 5.1 and that it is not in one of the situations covered by the exclusion criteria listed in EU Directive 2014/24/EU.
- Verification that the bidder has the appropriate capacities to perform the contract based on the Selection Criteria described in Section 5.2 (only for those bidders that were not excluded based on the Exclusion Criteria).
- Evaluation of the bidder based on the Award Criteria described in Section 5.3 (only for those bidders that have met the Selection Criteria). Scoring for each Award Criterion will be conducted using the following scale:
  - Excellent
  - Good
  - Average
  - Below average
  - Poor

- The Evaluation Committee shall evaluate the technical proposals first and shall thereafter open and evaluate the financial proposals of only those bidders whose technical proposals meet the minimum technical score.
- Where individual scoring is adopted, the Evaluation Committee shall discuss scores where there are significant discrepancies prior to computing the average score for each criterion.
- During financial evaluation, where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern. Where there is a discrepancy between the unit rate and the line-item total resulting from multiplying the unit rate by the quantity, the unit rate shall govern, unless in the opinion of the Evaluation Committee there is an obviously gross misplacement of the decimal point in the unit rate, in which case the line-item total shall govern, and the unit rate shall be corrected.

The proposal must comply with the GCA strategic requirements set in this RFP as a precondition to be assessed. In a case of non-compliance with the Exclusion Criteria, the bidder will be informed of the grounds for rejection without being given feedback on the content of the proposal other than on the non-compliant elements.

The evaluation of proposals shall be carried out by an Evaluation Committee made up of representatives of GCA. Any attempt by a bidder to influence the Evaluation Committee in the process of examination, clarification, evaluation, due diligence checks, etc., to obtain information on how the procedure is progressing or to influence GCA in its decision concerning the award of the contract, will result in the immediate rejection of the bidder's proposal.

In the interest of transparency and equal treatment, without being able to modify their proposals, bidders may be required, at the sole written request of the Evaluation Committee (via Procurement), to provide clarifications within 48 hours. Requests for clarification will only seek minor clarifications of information already submitted by the bidder. No modifications to a proposal can be sought or accepted through a request for clarification (except for the correction of arithmetical errors discovered during the evaluation of the proposal).

## 5.1 Exclusion Criteria

Participation in this RFP is open on equal terms to any natural and legal companies not in any of the situations listed in Article 57 of the EU Directive 2014/24/EU.

Bidders shall provide a Declaration of Honor (see Annex 2), duly signed and dated, including a statement that they are not in any of the situations listed in Article 57 of EU Directive 2014/24/EU. In case of a joint proposal such declaration shall be submitted for each partner. The declaration shall also be submitted for the subcontractors, when relevant.

Besides the submission of the signed Declaration of Honor, the bidder undertakes to inform GCA, without delay, of any changes to their situation in this regard.

Bidders may be excluded from participation in this RFP if they are found to be in one of the situations for exclusion or fail to submit the above-mentioned declaration.

## 5.2 Selection Criteria

Bidders will be evaluated against each Selection Criterion based on the documentary evidence submitted by the bidder. Failure to submit the evidence requested will lead to a rejection of the proposal. Bidders will be evaluated against the Selection Criteria on a **pass/fail basis**. Bidders

## **Annex 3: Scope of Work/Terms of Reference**

### **1. Preamble**

The Global Center on Adaptation (GCA) has partnered with the African Development Bank (AfDB) to provide support on a gender vulnerability assessment, for a water and energy investment project in Gabon titled “Integrated Program for the Development of Water and Energy Resources program in Libreville” that will be funded by AfDB. GCA is seeking a consultant to carry out part of this collaboration under these terms of reference.

### **2. About Global Center on Adaptation**

The Global Center on Adaptation works as a solutions broker to catalyze action and support for climate adaptation solutions. In 2021 the African Development Bank and the Global Center on Adaptation joined forces to develop and implement the Africa Adaptation Acceleration Program (AAAP). The AAAP galvanizes climate-resilient actions and delivers results through partnerships with Multilateral Development Banks and other leading implementation organizations, stakeholders, political and technical agencies. Within the framework of this partnership, GCA leads upstream activities with the broad goal of leveraging climate finance to mainstream climate risk in infrastructure investments.

### **3. The AfDB- financed Integrated Program for Water and Energy resources in Gabon**

Despite its abundant water resources, Gabon faces significant challenges in ensuring access to water and sanitation, with stark disparities between urban and rural areas. In 2022, Libreville’s water production capacity was 266,000 m<sup>3</sup>/day, which sufficiently covers the city’s daily estimated consumption of approximately 78,000 m<sup>3</sup>/day. However, the high volume of unbilled water—estimated at 172,000 m<sup>3</sup>/day—has led to inconsistencies in service quality and continuity, with an average supply duration of just 12 hours per day.

While 85% of Gabon's population had access to drinking water in 2022, only 50% had access to sanitation, with rural access rates even lower at 45% for drinking water and 40% for sanitation. Despite the ongoing efforts under the PIAEPAL program to enhance drinking water supply and reduce unbilled water in the distribution network, the Gabonese government is also focused on further boosting production. This includes constructing the Mbomo Phase 1 drinking water treatment plant with a capacity of 35,000 m<sup>3</sup>/day, expandable to 70,000 m<sup>3</sup>/day, slated for completion by December 2024, and planning a new treatment plant in Kango. Additionally, inspecting transmission lines, particularly the Ntoun-to-Libreville line, remains a priority to identify and address any water losses.

Climate change threatens to exacerbate these challenges, hindering the government’s goal of achieving universal access to drinking water. According to the World Bank, Gabon has a high degree of risk to natural hazards and is highly vulnerable to climate change impacts, which are expected to primarily affect the agricultural, water, energy, oil, and mining sectors, through seasonal flooding, changing precipitation, extreme winds and landslides. Temperatures are already observed to be increasing, and there are likely to be more extreme weather events occurring in Gabon's near to medium-term future.<sup>1</sup> These climate-related hazards pose significant risks to water and sanitation infrastructure, including erosion of water distribution networks, damage to wastewater treatment plants, and increased incidence of waterborne diseases.-

In the above context, the Gabonese authorities have identified and selected Libreville and its surroundings for: (i) the renewal of networks for the distribution and repair of drinking water leaks; (ii) the reinforcement of production (phase 2); (iii) housing two fecal sludge (wastewater) treatment plants; (iv) improving the "rainwater" drainage.

The objective of the Gabon Integrated Program for the Development of Water and Energy Resources program is to contribute to the sustainable improvement of water and sanitation services in Greater Libreville by (i) improving the availability of and access to drinking water, (ii) eliminating uncontrolled fecal sludge discharges, which are harmful to the environment and vectors of waterborne diseases; (iii) protection against floods, and (iv) the creation of new jobs in the process of fecal sludge recovery.

The project in preparation has three components:

**Component 1: Development of infrastructure for sustainable access to drinking water and sanitation**

This component addresses (i) improvement of drinking water supply and monitoring of water resources; (ii) fecal sludge management; (iii) rainwater drainage; and (iv) promotion of information, capacity building, and communication.

**Sub-component 1.1. Improvement of drinking water supply and monitoring of water resources**

This sub-component will include the following activities: (i) diagnosis, georeferencing, modelling and compliance of the drinking water supply system in Libreville; (ii) renewal of the dilapidated drinking water distribution network and transmission lines of Greater Libreville; (iii) strengthening of the production of drinking water in Greater Libreville from Mbomo phase 2; (iv) renewal of the distribution network and the repair of leaks in administrative establishments (CHUL and Omar Bongo National Technical High School); (v) reinforcement and extension of the drinking water distribution network in Greater Libreville; (vi) control and supervision of the water supply works; (vii) inventory and creation of a GIS associated database of water supply facilities in rural areas; (viii) strengthening of hydro-climatological and hydrometric monitoring networks; and (ix) updating of the master plan of the Libreville water supply system.

**Sub-component 1.2. Fecal sludge management** focusing on (i) construction of two fecal sludge treatment plants, including the Igoumié dry bed treatment plant with an omni processor system for the recovery of sludge and the Bambouchine dry bed plant; (ii) valorization of treated sludge products; and (iii) the control and supervision of the construction works of fecal sludge treatment plants.

**Sub-component 1.3 - Stormwater drainage and Information Education, and Communication (IEC)**. This sub-component includes (i) construction of rainwater drainage canals in the watersheds of Nzeng Ayong, Cité du 12 Mars, Terre Nouvelle, Ogombié and Gué-Gué and the rehousing of the affected populations; (ii) control and supervision of rainwater drainage works; (iii) establishment of the baseline situation through surveys on the behavior of populations (women and men) in terms of water, hygiene and sanitation; and (iv) information and communication campaigns on good practices in water, hygiene and sanitation.

**Component 2: Institutional support, capacity building and preparation for strengthening water security in Gabon.** This component focuses on institutional support, capacity building and enhancing water security.

**Sub-component 2.1: Institutional support and capacity-building** includes the following activities: (i) institutional support, which consists of providing all the necessary support to the structures in charge of managing the water sector to enable them to fulfil their roles, in accordance with the new water law, and in particular the adoption of the implementing texts of the Water Code and support for their effectiveness; (ii) capacity building of actors in the sector, which consists of identifying and supporting the satisfaction of the needs of the structures in charge of managing the water sector in terms of equipment and training, for the proper functioning of these structures.

**Sub-component 2.2: Preparation for Strengthening Water Security** is divided into two activities: (i) the establishment of water supply master plans in urban and rural areas and the design of a water security program, and (ii) the phasing of Gabon's water security program and the detailed studies of the first phase of this program.

**Component 3: Program coordination and management** support the program management unit through (i) the acquisition of assets including vehicles, computer equipment and office furniture; (ii) allowances and operation of the program coordination unit, and (iii) financial, procurement and environmental and social compliance audits.

The estimated cost of the program is 115 million units of account (UA). The breakdown of costs by component is presented in the table below for information purposes. It will be refined during the next missions to prepare and evaluate the project.

<b>Components</b>	<b>Million FCFA</b>	<b>Million UA</b>

#### 4. Objective of the Assignment

The gender vulnerability assessment aims to collect gender disaggregated data, identify climate gender vulnerability gaps in relation to water supply, sanitation, fecal sludge and stormwater management, and propose appropriate actions to narrow these gaps as an integral part of climate adaptation in the Greater Libreville area. Outcomes from this assessment will directly support and inform implementation of the AfDB project in Gabon.

The objective of this assignment is to enhance the climate resilience of water and sanitation infrastructure in the Greater Libreville area. More specifically the assignment will:

- a. assess how climate-induced disruptions (e.g., urban floods, service interruptions) disproportionately affect women and vulnerable groups in the project areas and identify gender-specific risks in water and sanitation services.

- b. develop a gender action plan and propose interventions to address the identified gender gaps and enhance overall climate resilience of the gender groups.

## 5. **Scope Of Services and Key Tasks to Be Performed**

The scope of work is organized around the four areas of work outlined above and an inception phase as detailed below. The deliverables are outlined in Table 1.

### **Inception Phase**

The inception phase ensures that everyone understands the project's goals and objectives, methods, and outputs. It allows a short period for mobilization of the consultant team, familiarization of the issues and features, identification and familiarization with the data and information already collected, its availability, and quality. It will include the acquisition or procurement of any additional data.

The main output will be the inception report, a concise document that confirms the overall project scope and firms up the methodology (especially on how to ensure that the assignment will inform and impact implementation on the ground) site selection, time frame, and milestones.

The inception report must contain a section on data that outlines the data, and information needs of the proposed methodology, including data sought from the AfDB task teams, their respective counterparts, and other stakeholders. This section should summarize existing data sources and detail a contingency plan for adapting the methodology should the data requirements be partially met.

The consultancy firm will be expected to outline:

- i. A detailed work plan/assessment to complete the assignment in time. The plan should provide detailed methodology of all the project components.
- ii. A detailed review of which data are available, data sources and which data can and cannot be collected, and a detailed strategy on mitigating challenges with obtaining necessary data. The report should also discuss the uncertainty and reliability of projected climate scenarios.
- iii. A workflow, from data collection to analysis (in relation to the workplan), tools to be used, and how the consultancy firm will assure the transparency and comparability of their results.
- iv. Outline a comprehensive stakeholder engagement plan including method(s) to identify and engage stakeholders (including local communities, local and regional authorities, the AfDB, and GCA) for collecting relevant data and for validation of the results.

Annex 2 lists a few questions that are intended to provide direction to the technical partner in developing their methodology and framework. They are designed to guide a comprehensive analysis of gender and socio-economic vulnerabilities in the context of climate resilience for water supply and sanitation interventions.

The inception report should be developed in close coordination with GCA through kick-off and follow-up meetings. The kick-off meeting will include participants from the AfDB project task team, respective government counterparts, and the GCA.

a. **Gender Vulnerability Assessment and Gender Action Plan**

The African Development Bank (AfDB) project will integrate gender equality across relevant sectors in the beneficiary areas, with targeted interventions to reduce the gender gap. The key objective of this task is to identify gender-specific climate vulnerabilities, particularly related to water supply, wastewater treatment, and sanitation in Greater Libreville, and to propose actions that close identified gaps while developing indicators to monitor progress.

The consultant will adopt an established framework to analyze the differentiated exposure, vulnerability (including intensifying factors and adaptive capacities), and impacts of climate hazards on men, women, and other gender groups. The focus will be on the sectoral themes addressed by the project, such as water supply, sanitation infrastructure, and rainwater management.

The assessment will utilize both secondary and primary data, including interviews with key informants and focus group discussions. It should also incorporate insights from local stakeholders who promote gender rights in Gabon and the project locations in Greater Libreville.

Specific tasks include:

- **Identify Gender Profiles, Vulnerabilities and Risks:** Provide a gender disaggregated risk profile (men, and women considering their diversity) socio-economic (e.g. age, income, livelihood, religion etc.) and other vulnerabilities related to climate change, specifically concerning water supply and wastewater treatment in project areas, including urban, peri-urban, rural, and both formal and informal settlements in Greater Libreville.
- **Assess Gender Gaps, and Adaptive Capacities:** Analyze gender profiles and identify gender gaps, for any gender group and their adaptive capacities. Develop an index to determine level of vulnerabilities in relation to their water security, access to water and participation in decision making. This index should address these following questions:
  - Who is vulnerable?
  - To what are they vulnerable?
  - Why are they vulnerable?
  - What are the specific barriers women/girls face in accessing climate-resilient water and sanitation services?
  - What can be done to reduce their vulnerability and increase their resilience (build adaptive capacity)?
  - What is the likely impact of the intervention on their vulnerability?

- Identify climate risk impact typologies specific to water security across greater Libreville, highlighting areas most exposed and vulnerable to climate-related events (e.g., floods, droughts, and storm surges). Include a map to illustrate the findings.
- **Develop a Gender Action Plan:** Formulate a gender action plan based on the risk typology, outlining key actions and opportunities to address gender gaps and promote gender equality. Ensure a logical chain from identifying the gender gap to defining actions and gender indicators aligned with the project's investment components and activities. Design and incorporate indicators to monitor the outcomes of these actions. Any additional actions beyond those already proposed in the AfDB project should have a climate rationale and be prioritized based on their potential impact, feasibility, and alignment with the local context (legal, constitutional, political, and socio-cultural).
- **Stakeholder Engagement and Validation Workshop:** Organize at least one workshop in Greater Libreville with relevant stakeholders to validate the analysis. This workshop should be integrated into broader stakeholder engagement activities and pre-approved by AfDB and GCA.

This task will complement and build on existing gender analyses, gender-specific activities, and gender-disaggregated indicators within the project. The methodology and recommendations should align with the AfDB Gender Strategy (2021-2025) and relevant guidelines, including AfDB's guidance on preventing, mitigating, and responding to sexual exploitation, abuse, and harassment (SEAH).

As part of its technical assistance to the AfDB project, GCA has commissioned a Climate Risk Assessment (CRA) focusing on water supply, sanitation, fecal sludge, and stormwater management for the Greater Libreville area. The CRA will also focus on identifying and appraising adaptation solutions to the identified risks and enhancing capacity of target stakeholders on climate resilient water management.

The GVA consultant is expected to collaborate closely with the CRA consultant to ensure their work is complementary. This collaboration will help align their findings and outputs, ensuring a cohesive and well-informed approach.

## 5. Questions Suggested to Guide the Methodology and Framework of Analysis

These questions have been suggested to provide clear direction to the technical partner in developing their methodology and framework. They are designed to guide a comprehensive analysis of gender and socio-economic vulnerabilities in the context of climate resilience for water supply and sanitation interventions.

### 1. Who is vulnerable?

Which specific gender groups (men, women, marginalized communities) in the Greater Libreville area are most vulnerable to water supply, sanitation, fecal sludge, and stormwater management challenges?

### 2. To what are they vulnerable?

How are these vulnerable groups disproportionately impacted by climate change, specifically in relation to access and resilience of water and sanitation infrastructure?

### 3. Why are they vulnerable?

What socio-economic factors, gender norms, or systemic barriers contribute to the heightened vulnerability of these groups in accessing climate-resilient water and sanitation services?

### 4. What can be done to reduce their vulnerability and increase their resilience?

What gender-responsive interventions can be implemented to address the identified gender gaps and reduce vulnerabilities in water supply, sanitation, faecal sludge, and stormwater management in the context of climate adaptation?

### 5. What is the likely impact of an intervention on their vulnerability?

How will proposed gender-sensitive actions, such as improved infrastructure or policy changes, affect the vulnerability of different gender groups, and how can their resilience to climate impacts be enhanced?

### 6. What are the specific barriers women/girls face in accessing climate-resilient water and sanitation services?

How can these barriers be addressed through climate adaptation options to improve access and equality? How do these barriers affect climate adaptation options and hinder resilience?

### 7. How can gender-responsive strategies enhance the climate resilience of water and sanitation infrastructure?

What are the potential long-term benefits of incorporating gender and socio-economic considerations into climate adaptation strategies for these services?

## **ARTICLE 10**

### **10. Intellectual, Industrial and Proprietary Rights**

10.1 All right, title and interest in the Deliverables, including any products, methods, works and/or materials developed by the Contractor, in whole or in part, during or in connection with this Contract, shall automatically vest in the GCA upon creation and the GCA shall be the sole and unlimited owner thereof and of rights therein throughout the world perpetually. GCA shall retain all such rights therein, including but not limited to statutory copyrights, and all renewals thereof, as a copyright author and proprietor.

10.2 The Contractor agrees to execute and deliver, and to use maximum endeavors to cause any subcontractor to execute and deliver, to GCA any and all materials, instruments, source documents, designs, instructions and codes reasonably required by the GCA in connection with the use, adaptation, execution and enjoyment of the Deliverables and of the GCA's rights therein and thereto.

10.3 Contractor undertakes to do everything necessary to ensure that all existing and any future Intellectual and/or Industrial Property Rights pertaining to the Deliverables are (and remain) vested with GCA or with third party designated by the GCA. The Fee or rates that Contractor charges to GCA in the context of the Contract shall be deemed, in as far as necessary, to include payment for these Intellectual and/or Industrial Property Rights. To effect this transfer, the following acts must at any rate be performed: by signing the Contract, Contractor transfers to GCA all existing and future Intellectual and/or Industrial Property Rights to existing and future Deliverables and the results of the Services.

10.4 Insofar as these acts prove not to ensure that all Intellectual and/or Industrial Property Rights are transferred to the GCA, the Contractor undertakes, if the situation arises, to do everything possible to effect the transfer, without the Contractor being allowed to attach further conditions to its cooperation. As long as this has not been done, Contractor hereby gives the GCA: an irrevocable authorization to exercise and protect the powers arising from the relevant Intellectual and/or Industrial Property Rights in and out of court; an exclusive, royalty-free, transferable, irrevocable, perpetual, and worldwide license, to use all Deliverables and all Intellectual and/or Industrial Property Rights pertaining thereto.

10.5 Notwithstanding the foregoing, insofar as Contractor has made any material available to GCA, to which material Contractor has Intellectual and/or Industrial Property Rights, Contractor states that it shall grant GCA a non-exclusive and non-transferable right to use this material.

10.6 The Contractor shall hold or obtain all consents, permissions and/or clearances in third-party intellectual property rights necessary to enable it to perform the Services. The Contractor shall be liable for any violation of legal provisions or rights of third parties in respect of all rights used in the Deliverables or during the performance of the Services. The Contractor, to the extent permitted by law, agrees to indemnify and hold

harmless the GCA from all claims and causes of action asserted by third parties based on (alleged) Intellectual and/or Industrial Property Rights or on any other basis.

10.7 It is acknowledged and agreed by the Parties that GCA owns all property rights and may use, adapt, add to and subtract from the Deliverables and combine these with other artistic or literary material and to publish the result by any means, it being understood that the Contractor (including its employees and subcontractors) hereby waives and agrees not to exercise or enforce any so-called “moral rights” which may now or may hereafter be recognized.

10.8 GCA grants Contractor a non-exclusive, non-transferable, non-assignable and limited right and license to use the following only to perform the Services in accordance with this Contract: The GCA’s trademarks, trade names, tag lines logos or service marks and any information made available to the Contractor by the GCA.

## **ARTICLE 11**

11.1.1 Either Party, if the other Party becomes insolvent, has applied for a suspension of payment, or that other Party has been adjudicated bankrupt;

11.1.2 Either Party, if the other Party is prevented by force majeure from complying with its obligations wholly or in part for a period of three months or more;

11.1.3 Either Party, if the other Party discontinues its business operations;

11.1.4 The GCA, if the Contractor, after a written demand from the GCA allowing a reasonable time for compliance, still fails attributable to comply promptly, properly or at all with any obligation under this Contract;

11.1.5 The GCA, if there is any doubt about the reliability and/or integrity of the Contractor, resulting from the screening process including but not limited to, for example, the condition that it has been determined that the Contractor has been involved in serious incidents or irregularities with previously contracted persons, clients, employers and/or on previous assignments;

11.1.6 The GCA, if one or more of the exclusion criteria mentioned in section I or section II of the signed Declaration on Honor becomes true for the Contractor.

11.2 Termination of this Contract shall not affect the other rights and/or recovery possibilities of the Party terminating it.

11.3 In the event of termination by GCA due to the fault of the Contractor, the GCA shall withhold and deduct from payment to Contractor the amount reasonably deemed necessary to complete the Services and deliver the Deliverables.

11.4 Unless and to the extent otherwise specified in this Contract, on the termination of this Contract for any reason, the GCA shall be responsible for paying the part of the Fee for Deliverables that have been accepted by the GCA up to and including the effective date of termination.

11.5 In the event that either Party wishes to terminate this Contract, a 30-day notice period will be taken into account by both the Contractor and the GCA, except for the situations mentioned in Article 11.1 above.

11.6 The following Articles shall survive any termination, cancellation or expiration of this Contract, together with any other provisions herein that by their nature shall survive: Article 7 (Warranties), Article 8 (Indemnification), Article 9 (Confidentiality and Marks), Article 10 (Intellectual, Industry and Proprietary Rights), Article 14.8 (Notice) and Article 15 (Applicable Law).

## ARTICLE 12

From that moment all the fees involved will be considered as (gross) wages including holiday allowance and be reduced to the level where payment without wage taxes and/ or social security contributions can take place.

## ARTICLE 13

### 13. Sickness and Inability to Work

13.1 The Contractor agrees to bear the risks pertaining to the Services, including sickness and inability to work, and if the Contractor takes out insurance to cover such risks, the Contractor shall bear the cost of such insurance.

13.2 The Contractor shall not invoice the GCA any days on which the Contractor was unable to perform the Services due to illness, leave or any other reason.
